

Hayseed Hank's SUPER SOIL

WHAT IT IS

Hayseed Hank's Super Soil is an enriched soil created from a screened blend of topsoil, Bull Country Compost and composted yard waste. It is nutrient rich and does not require any additional compost or fertilizer.

WHERE TO USE IT

- Fill a raised bed
- Create a new garden
- Boost new plantings
- Patch existing lawns
- New lawn install
- Potted plants

HOW TO USE IT

CREATING NEW GARDENS

For best results, eliminate sod or previous plantings before installing a new garden or raised bed. Fill with Hayseed Hank's to planting root depth, 6 to 10".

OPTIONAL: Lay down 8-10 layers of newspaper before filling the area to help prevent previous seed and root growth.

ESTABLISHING NEW TREES & PLANTS

Improve the success of new plantings of trees, shrubs, annuals and perennials. Dig a hole 2 times the size of the root ball, place Hayseed Hank in the base making sure to follow suggested planting depths. Finish filling the hole with Hayseed Hank. Cover with mulch, if desired.

LAWN PATCH REPAIR & NEW LAWN INSTALL

NEW LAWN INSTALL:

FOR EXISTING TOPSOIL - Cover the ground with 1/2" to 1" of Hayseed Hank before sowing grass seed. Cover seed with 1/4" of Hayseed Hank.

IF NO TOPSOIL EXISTS - Cover the ground with a minimum of 2" of Hayseed Hank before sowing grass seed. Cover seed with 1/4" of Hayseed Hank.

LAWN PATCH:

Cover areas in need of patch with 1" to 2" of Hayseed Hank's, cover with grass seed according to packaging suggestions and cover with 1/4" of Hayseed Hank.

HOW MUCH DO YOU NEED

STEP A Measure the space you want to cover to calculate the square feet.

Width x length equals square feet

STEP B Choose the depth of compost desired in inches.

Note: you must use a decimal for the next step; i.e. 1/4" = .25

STEP C Use the following to calculate how much compost you need:

Square feet (A) x Depth of Compost (B) x .0031 = ____ cubic yards
(1 cubic yard = 40 - 40 lb. bags)
